## Beef & Galician Autochthonous Rubia Gallega Cow

Our cattle come from the interior of Galicia, reared in total freedom, fed in a natural way, based on grass and natural grain. The selection is carried out personally with our cattle dealer, rigorously choosing the cattle that have a 100% natural diet. The choice of the pieces to be matured is very rigorous, having to meet certain insurmountable parameters: weight, external fat infiltration and intramuscular fat infiltration.

Maturation improves the flavour, tenderness and juiciness of the meat. At DIVINO, we mature with DRY-AGED, where the temperature, air and humidity are totally controlled, incorporating advanced techniques and our own knowledge, which improve the quality of our raw materials.

The meat will differ according to the breed, age, feed and sex of the animal.

This is how the texture, aroma and flavour are unique to DIVINO exclusive meats.
